CREATING VALUE AND MINIMIZING WASTE ON THE MAINFRAME, AN IBM SYSTEMS MEDIA WEBINAR

The digital world has increased the velocity of change to meet customer needs, affecting your mainframe workloads from a cost and performance perspective. You need to create value and minimize waste on your mainframe for continued success. BMC and IBM Systems Media will host an informative webinar on Wednesday, June 19 at 1:00 pm ET explaining how with Lean tools you can do just that! Lean, a methodology made famous by Toyota, can be applied to your mainframe to increase efficiency and agility. Join Jeremy Hamilton, Product Account Executive at BMC Software, to learn how to apply Lean principles to your mainframe to reduce cost and improve performance so you can adapt to the continuously changing environment.

Wednesday, June 19th at 1:00 PM ET

REGISTER FOR THE WEBINAR HERE

During this webinar, find out how you can:

- Gain end-to-end insight into your mainframe processes
- Identify and eliminate common drivers of waste
- Achieve continuous improvement in your mainframe operations

Watch the webinar to learn more! If you are unable to make the live session on June 19th, sign up and you will receive a recorded version of the webinar and slides. Hope to see you there!
