

EMA RADAR REPORT FOR WORKLOAD AUTOMATION

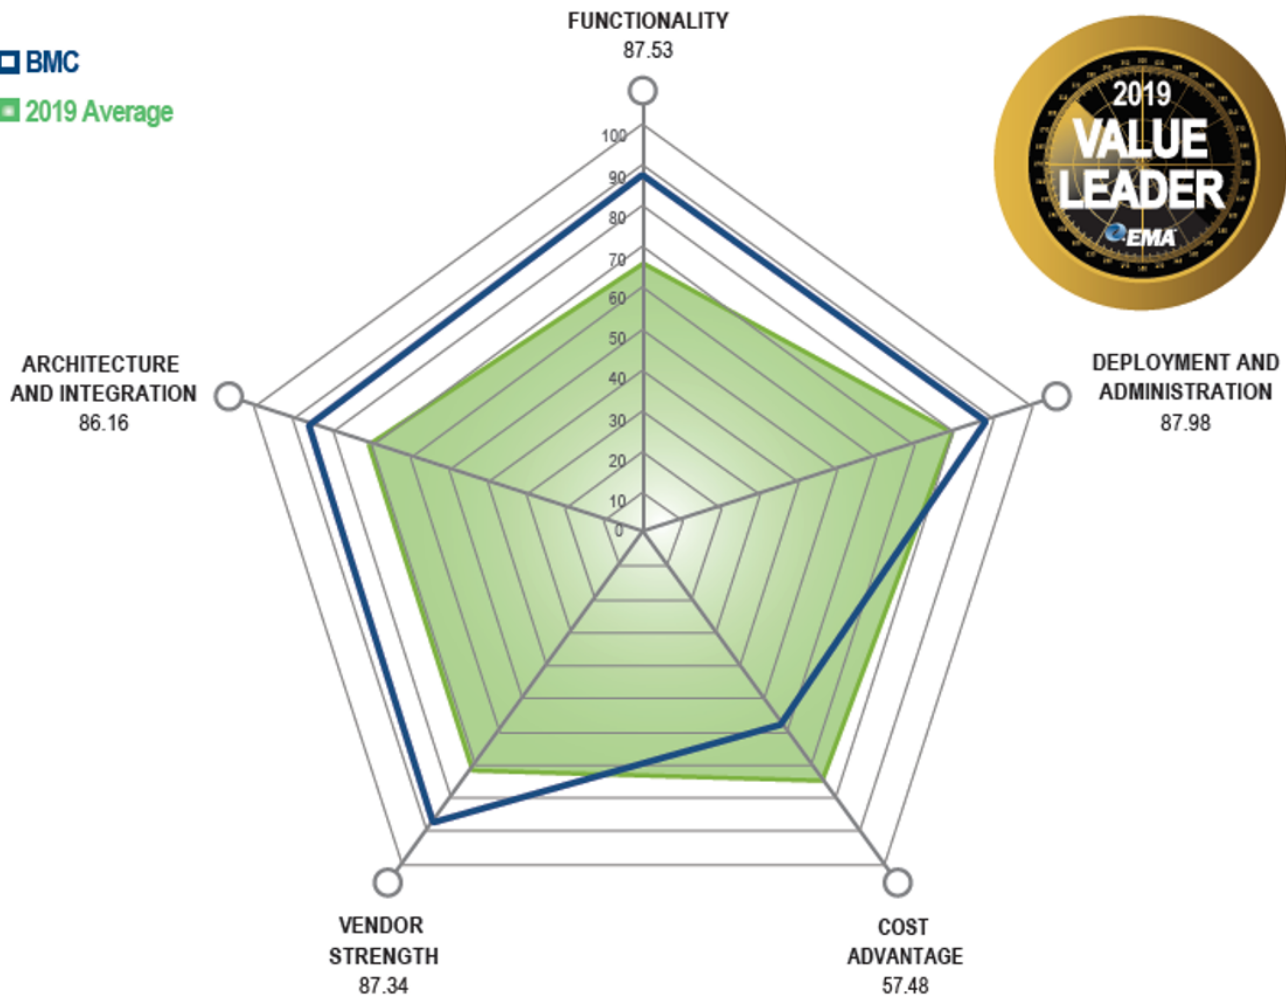

We're really pleased because for the fifth time, Control-M has been named Value Leader of the Enterprise Management Associates (EMA) Radar Report for Workload Automation. According to the report, Control-M significantly outpaced the average of its competitors across 4 of 5 evaluation categories including:

- Functionality
- Deployment and Administration
- Architecture and Integration
- Vendor Strength

Download the report to get more details on the EMA analysis and learn about features that can help your organization gain a competitive advantage with digital business automation. This snapshot below zeroes in on where BMC appears on the EMA radar screen.

2019 Average

Source: 2019 EMA Radar Report for Workload Automation

According to the 2019 EMA Radar report, "The current focus for Control-M centers around end-to-end orchestration across multiple clouds, simplifying and scaling data pipelines, and supporting [DevOps](#)." Product highlights noted in the report include:

- **Near-zero downtime with in-place upgrades:** Annual release cycle makes it easier for users to plan and upgrade and take advantage of powerful new Control-M features
- **Out-of-the-box cloud integrations:** Organizations can easily use Control-M to orchestrate workflows across leading [PaaS](#) offerings with support for cloud authentication and new native integrations with both AWS (Lambda, StepFunctions, Queues, and S3) and Azure (Function, LogicApps, Queues, and HDInsight)
- **Jobs-as-Code expansion:** Includes new configuration, authorization, and deployment tasks, support for embedded scripts through JSON, and dynamic provisioning of Control-M in the cloud and with containers, helping to accelerate Dev and Ops collaboration
