

CONTROL-M EARNS TOP SPOT IN EMA'S 2023 WORKLOAD AUTOMATION AND ORCHESTRATION RADAR REPORT

Leading industry analyst and consulting firm Enterprise Management Associates just released its *EMA Radar™ Report for Workload Automation and Orchestration 2023*, and BMC is proud to share that [Control-M](#) was named a Value Leader and achieved the overall highest score among the vendors evaluated. Since 2010, EMA has published seven *Radar Reports for Workload Automation* and BMC has been recognized as the overall leader every time. In addition to BMC's top ranking, Control-M (self-hosted) and [BMC Helix Control-M](#) (SaaS) were recognized for offering “... a range of innovative features that streamline the creation, management, and monitoring of application and data workflows... across diverse hybrid and multi-cloud environments.”

The report highlights four key evaluation categories where Control-M significantly outpaced competitors:

- Functionality
- Deployment and administration
- Architecture and integration
- Vendor strength

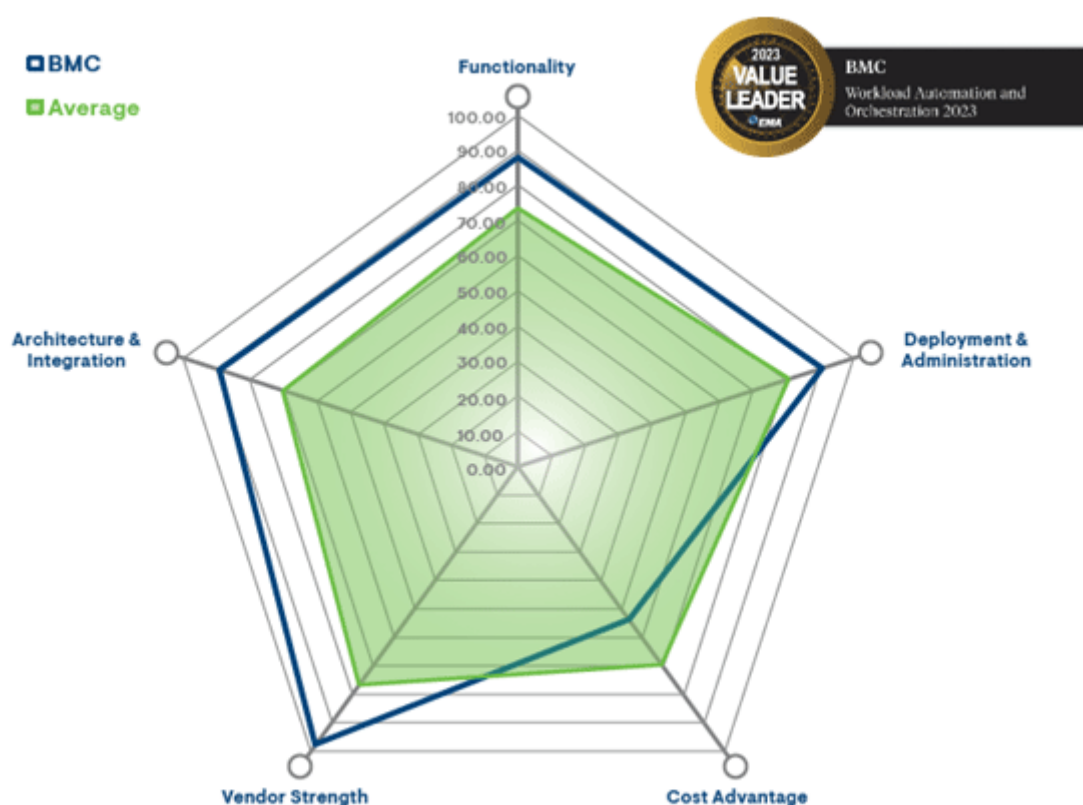

In the report, EMA also notes that “BMC brings an innovative and efficient approach to data pipeline orchestration. Navigating on-premises and cloud technologies, the platforms facilitate data pipeline creation, integration, and automation across platforms like Airflow and cloud services...”.

Highlighted features include:

- Seamless integration, automation, and orchestration “... of workflows across workflows across diverse hybrid and multi-cloud environments.”
- Control-M and Helix Control-M's “... vast (and rapidly expanding) catalog of out-of-the-box integrations”
- Self-service interfaces for “... developers, data and cloud engineers, business users, and IT operations teams.”

During their research, EMA also interviewed BMC customers who shared the following insights:

- “I am the Control-M evangelist because of the flexibility and integration.”
- “Control-M is one of the most stable things I run. I don't lose sleep over Control-M, and that's my favorite thing.”
- “commitment to innovation and R&D is impressive.”
