

NETREO, A BMC COMPANY, EARNS NETWORK INFRASTRUCTURE PRODUCT OF THE YEAR

It is my pleasure to announce that [Netreo](#), a BMC company, has earned the distinction of [Network Infrastructure Product of the Year](#) in *Network Computing's* annual celebration of the industry's best vendors, innovators, and resellers. Thanks to our customers, partners and industry professionals for your votes. And congratulations to our Netreo team and reseller community for delivering award-winning network performance monitoring and diagnostic (NPMD) solutions to our customers.

While Netreo has received numerous accolades from *Network Computing* in the past, being recognized as the top product in its flagship award category is a first.

NETWORK INFRASTRUCTURE PRODUCT OF THE YEAR

We are excited to bring these great NPMD capabilities into the BMC Helix full observability platform, enabling our customers to manage increasingly complex and hybrid IT systems where network performance is a key component.

The [Netreo NPMD solution](#) improves business outcomes and simplifies network performance optimization with comprehensive network observability and automated device onboarding, configuration, issue resolution, and administration. As part of the BMC Helix portfolio, Netreo gives our customers end-to-end network and code-level observability.

Netreo also won [Testing/Monitoring Product of the Year](#) for an unprecedented eighth time, and the eighth time in nine years. Out of the other seven categories where Netreo was a finalist, it was the runner up for the Customer Service Award and overall Product of the Year.

Netreo Wins Testing / Monitoring Product of the Year!

For the 8th time in 9 years from *Network Computing Magazine*

★ WINNER ★

TESTING/MONITORING
PRODUCT OF THE YEAR

The *Network Computing* Annual Awards recognize the products, people, and programs leading the way in strategic and innovative network management across more than 30 categories. Each year, finalists and category winners are determined through online voting from *Network Computing* readers, network users, IT consumers, and industry professionals.
